General Marking Principles for National 5 Music Technology

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this Paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must always be assigned in line with these General Marking Principles and the Detailed Marking Instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) You should not accept any answer that is not in the Marking Instructions. Use professional judgement when candidates' responses do not exactly match the Marking Instructions but carry the same meaning.
- (d) Candidates are asked to tick one or two boxes in multiple choice questions. Accept a cross or any other sign which makes the candidate's intentions clear.
- (e) Where a candidate has provided more than one answer, eg by ticking two boxes instead of one or adding an extra wrong answer, place a cross beside the wrong answer and deduct the mark assigned to the correct answer. If this has happened more than once, or several times, the mark cannot go below zero, ie into negative marks.
- (f) Accept inaccurate spelling where the candidate's intention is clear.
