# General Marking Instructions

## Marking principles for National 5 Administration and IT assignment

These general principles should be applied when marking the candidates' assignment printouts. These principles must be read in conjunction with the specific Marking Instructions provided for the assignment.

Marks for the assignment must always be awarded in line with these general marking principles and any specific Marking Instructions for the sections.

Marking should always be positive.

Candidates will be awarded marks for specific skills and theory.

Marks will be awarded for demonstrating skills in the use of the different IT application in the following areas:

### **Spreadsheet – 18 marks (+/-3 marks)**

- ♦ entering and editing text
- ♦ using formulae and functions to perform calculations and summarise information
- ♦ using functions to manipulate information

### **Database – 18 marks (+/-3 marks)**

- ♦ entering and editing text
- ♦ displaying information as a form and/or report
- ♦ manipulating information

### **Word processing – 18 marks (+/-3 marks)**

- ♦ entering and editing text
- ♦ layout and presentation of information

### **Desktop publishing – 18 marks (+/-3 marks)**

- ♦ entering and editing text
- ♦ presentation and layout of information
- ♦ key information included

### **Communication – 18 marks (+/-3 marks)**

- ♦ entering text
- ♦ key information included

### **Theory – 15 marks (+/- 5)**

- ♦ marks will be awarded for providing responses as part of an integrated IT task

**Layouts**

Marks will be awarded for a wide variety of layouts used in word processing and desktop publishing tasks. Candidates will not be penalised for applying a layout to a document that is different to one that has been supplied in specific marking instructions. The over-riding principle is that a document must be 'fit-for-purpose'.

**Printouts**

Candidates are clearly directed, within the instructions, as to the printing requirements. Where a printout for a task is missing, marks will be awarded on another printout for the same task, eg value and formulae printouts for a spreadsheet.

**Keying-in**

Marks will be awarded for every block of text that is accurately keyed in. This will be for approximately every 20 words. Flags may be included, where appropriate, to identify where marks are awarded.

Dear Parent/Guardian

Paris Trip 16-22 October 2015

1S

1L

As you may know, we have been running an annual trip to Paris, France for a number of years. The trip takes place in October. Your son/daughter has expressed an interest in participating in the 2015 trip and this letter is really intended to set out as much information as possible at this early stage.

The first deposit of £95 will be payable on Monday 1 June 2015 AT MORNING INTERVAL. Details of further instalments will be shown on the school website.

**Programme:** Our plan is to visit famous Parisian landmarks such as the Sacre Coeur, Eiffel Tower and Notre Dame Cathedral. We will also visit the Louvre - a trip to Paris would not be complete without a visit to the Mona Lisa! There will be a full day at Disneyland Paris too.

**Accommodation:** We have stayed at the Hotel Haussmann 6 times in the past and have found it to be excellent. They allow students to have access to the swimming pool and we are also given access to a large room where we can have entertainment in the evening.

**Trip Includes:** Travel by private coach, Eurotunnel, accommodation, all meals and excursions.

## Task 14

### SECURITY

Organisations have a responsibility to ensure the security of people and information. Describe 2 methods which organisations could use for each.

| Security of People |                                                                                                      | Security of Information |                                                                                                                                        |
|--------------------|------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| 1                  | Install intercom/swipe card/keypads/iris/fingerprint recognition - prevents unauthorised entry.      | 1                       | Purchase/Install anti-virus software to ensure files are protected from viruses.                                                       |
| 2                  | Employ security guards - prevents unauthorised entry.                                                | 2                       | (The organisation) should set up appropriate access rights for employees so that only authorised staff can view necessary information. |
| 3                  | Install CCTV - to monitor who is entering and leaving the building.                                  | 3                       | (The organisation) should train staff to put passwords on files to prevent unauthorised editing/viewing.                               |
| 4                  | Provide/issue all staff and visitors with ID badges so that unauthorised visitors can be identified. | 4                       | Provide locks on filing cabinets and computers - to ensure only authorised staff can access.                                           |
| 5                  | Provide uniforms for staff so that members of staff can be identified.                               | 5                       | Introduce appropriate back-up procedures so that a spare copy is available.                                                            |
|                    |                                                                                                      | 6                       | Provide a log-in and password for staff to prevent unauthorised editing/viewing.                                                       |
|                    |                                                                                                      | 7                       | Set up a system whereby employees are prompted to change their password regularly to prevent unauthorised editing/viewing.             |
|                    |                                                                                                      | 8                       | Install intercom/swipe card/keypads/iris recognition/fingerprint recognition which prevents unauthorised entry.                        |
|                    |                                                                                                      | 9                       | Install alarms which will alert staff to an intruder.                                                                                  |
