General marking principles for National 5 Business Management

This information is provided to help you understand the general principles you must apply when marking candidate responses to questions in this paper. These principles must be read in conjunction with the detailed marking instructions, which identify the key features required in candidate responses.

- (a) Marks for each candidate response must **always** be assigned in line with these general marking principles and the detailed marking instructions for this assessment.
- (b) Marking should always be positive. This means that, for each candidate response, marks are accumulated for the demonstration of relevant skills, knowledge and understanding: they are not deducted from a maximum on the basis of errors or omissions.
- (c) If a specific candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.

- (d) i. Questions that ask candidates to Describe...
Candidates must make a number of relevant, factual points up to the total mark allocation for the question. These should be key points. The points do not need to be in any particular order. Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question

- **1 mark** should be given for each accurate relevant point of knowledge
- a second mark could be given for any point that is developed from the point of knowledge.

- ii. Questions that ask candidates to Explain...
Candidates must make a number of points that relate cause and effect and/or make the relationships between things clear, for example by showing connections between a process/situation. These should be key reasons and may include theoretical concepts. There is no need to prioritise the reasons.

Candidates may provide a number of straightforward reasons or a smaller number of developed reasons, or a combination of these.

Up to the total mark allocation for this question

- **1 mark** should be given for each accurate relevant point of reason
- a second mark could be given for any other point that is developed from the same reason.

- iii. Questions that ask candidates to Compare...
Candidates must demonstrate a true comparison in order to gain any mark. Both sides of the point must be clear but need not be linked. Candidates can write several points regarding the first comparison item followed by several points on the second and the marker match the points using codes (for example, a, b, c)

Up to the total mark allocation for this question

- **1 mark** should be given for each compared point.

Marking instructions for each question

Question				ected response	Max mark	Additional guidance
1.	(a)	(i)	Responses should include • Finlay/owner/entrepreneur • employees • customers/retailers • suppliers • delivery company/Rail • local community • Young Scot	ur/shareholders Mail	2	Candidates must identify 2 stakeholders from the case study to gain full marks.
